

Laser motion sensor

The sensor is compatible with SCR stair drivers. This model allows for automatic detection and starting illumination sequence. This model is also equipped with function of adjustment of range.

Laser motion sensor is ready to install in electric box (60mm). Range of detection might be adjusted with small screw which is situated on the back of the casing.

TECHNICAL DATA

| | |
|-----------------------------|----------------------------------|
| Power: | 12-24 V |
| Standby power consumption: | 6 mA |
| IP level: | IP20 |
| Adjustment: | Range detection |
| Detection range adjustment: | Up to 1,5m |
| Operating temperature: | from -10°C to +50°C |
| Dimensions: | Front diameter Ø73mm; depth 31mm |
| Assembly method: | flush-mounted box Ø60mm |
| Type of material: | plastic |
